SUMMARY

Frontend Developer with 1+ year of hands-on experience in building responsive web applications using React.js, JavaScript (ES6+), HTML, and CSS. Experienced in developing dynamic dashboards, integrating REST APIs, and improving UI performance and user experience. Background in automation testing with 3+ years of experience, bringing strong debugging skills, attention to detail, and a focus on delivering reliable, high-quality applications.

WORK EXPERIENCE

Software Engineer (Frontend / UI Development & Automation) -Eterna Infotech Manipal Jan 2023 - Present

- Developed responsive UI using React.js (hooks), JavaScript (ES6+), HTML, and CSS, improving usability by 25%
- Integrated 10+ REST APIs with validation and async handling, reducing UI issues by 20%
- Fixed layout, rendering, and performance issues, decreasing defects by 30%
- Wrote automated tests using Jest and Selenium for critical workflows (250+ records)
- Debugged and optimized performance using browser DevTools in Agile environment
- Contributed to code reviews and refactoring, and mentored 15+ interns by helping them debug issues and follow React best practices

Front -End Developer - Applied Cognition Systems Manipal

Mar 2022 - Nov 2022

- Built reusable and responsive UI components using HTML, CSS, and JavaScript (ES6+), improving efficiency by 25%
- Improved performance and responsiveness, reducing UI defects by 30% and debugging time by 20%
- Integrated backend APIs for reliable data flow and stable UI rendering

PROJECTS

HealthLogix – Surgery Analytics Dashboard (React)

[Github Link](#)

[Live Demo](#)

- Developed a React-based health dashboard with authentication, protected routes, and secure login/logout functionality
- Implemented a demo mode with simulated data, allowing users to explore application features without account creation
- Integrated data visualization using pie and line charts to represent surgery types and weekly trends
- Designed and implemented CRUD operations for managing patient and surgery records
- Developed advanced table features including pagination, filtering, and sorting for efficient data management
- Implemented lazy loading and skeleton loaders to enhance performance and improve user experience
- Added light/dark theme toggle using Context API for improved accessibility and UI customization

Shopping Cart(React)

[Github Link](#)

[Live Demo](#)

- Built a responsive e-commerce app with product listing, filtering, cart management, and multilingual support.
- Integrated REST APIs with loading/error handling; implemented persistent cart via localStorage.
- Developed dynamic language switcher; managed state with React Hooks and SPA navigation using React Router.
- Deployed on Vercel with GitHub version control.

SKILLS

- Languages & Core: HTML5, CSS3, JavaScript (ES6+), TypeScript,
- Frontend Development: React.js, Next.js, Redux, React Query, React Router, Functional Components, Hooks
- Styling & UI: Tailwind CSS, Bootstrap, Responsive Design, Flexbox, CSS Grid, Component-Based Architecture
- Testing & Quality: UI Testing (Jest, React Testing Library)
- Tools & Others: Git, GitHub, REST APIs (Fetch, Axios), npm, Vite, Webpack, Chrome DevTools, Figma

EDUCATION

Bachelor of Science Physics, Mathematics, and Statistics- Mangalore University-2021
